**CRESTMONT NORTH  
HEALTHCARE**

**Crestmont North Healthcare** focuses on long-term care but also provides short-term, respite and specialized care as needed. As a 24-hour skilled nursing care facility, we offer individualized plans of care for all residents and begin to plan for discharge as soon as short-term residents arrive.

*Among our Services:*

- Physical, occupational and speech therapy
- Restorative nursing
- IV therapy
- Psychological
- Nutrition and specialized diets
- Hospice care

*Our Care Covers a Range of Needs:*

- Orthopedic
- Stroke
- Cardiac
- Wound

What kind of attention and services does Crestmont North provide?

Even before a patient arrives, we put together a team of caring professionals including board certified physicians, nurse practitioner, therapy specialist and skilled nursing clinicians to create individualized programs, monitor residents, progress and adjust as necessary. Our social service staff works with families to plan the return home.

You can trust that our dedicated team will keep you and your family informed throughout the process, including home assessment referrals to agencies and organizations within your community.

How does Crestmont North work with a resident's doctor and medical team?

Residents who have a private physician can keep their current doctor who in turn works with Crestmont North's medical director and nurse practitioner to create a personalized care plan. Residents who do not have a private physician will be served by the Crestmont North Care Team, consisting of a licensed physician, medical director and a nurse practitioner.

What type of payment does Crestmont North accept?

We accept private pay, HMOs and PPOs. As a Medicare- and Medicaid-certified facility, we accept both Medicare and Medicaid payments. We also take ongoing steps to ensure regulatory compliance and paperwork completion in a proper and efficient manner.

**Unique Rehabilitation Therapy**

Recovery from significant surgery, injury or illness may create the need for rehabilitation. We recognize the value of active rehabilitation therapy, helping residents gain independence through individualized plans of physical, occupational and/or speech therapy.

**Short-term/Respite Care**

Sometimes residents are ready to leave the hospital but not ready to return home. Our nursing and medical professionals provide supportive care and comprehensive services for the temporary situation so patients can return home and live independently.

**Long-term Care**

Crestmont North specializes in the transition to a nursing facility. Some residents, due to their illness, may have to stay longer than short term. We offer ways to make that transition streamlined by offering a rich environment filled with activities and dedicated caregivers. Our caregivers and medical professionals assist the residents in daily living routines.

**Hospice Care**

Creating a peaceful environment for our residents and family focused on compassionate care is the basis for our hospice care services. We manage the needs and symptoms of residents according to the wishes of the residents and their families.
